

Washington Matattias Presentation Report

Washington Matattias Presentation Report

Portfolio Details

- GitHub username: matattiasw-ai - Repository: WashingtonMatattiasPortfolio - Live portfolio: <https://matattiasw-ai.github.io/WashingtonMatattiasPortfolio/> - Project: SiteSpy

Project Summary

SiteSpy is a mobile-focused project tool built with Expo React Native and Firebase. It supports construction project records, measurement review, estimate summaries, and clear project reporting.

Contribution Summary

My contribution focused on final integration, build readiness, portfolio coordination, and keeping the project aligned for delivery.

Challenge and Solution

The main challenge was coordinating many moving parts into a coherent final package. The solution was a presentation-deck style report.

Learning Reflection

I strengthened my understanding of release preparation, Git history, team coordination, and technical handover.

Presentation Notes

- Explain what SiteSpy does for a user. - Describe the assigned project area. - Connect the public portfolio to the GitHub repository. - Discuss GitHub Pages deployment and team collaboration. - Refer to real screenshots only after they have been captured from the student's own repository or project work.
